

Quik Dri 1000

Quik Dri 1000 is a water-soluble liquid product developed for use in the final hot water rinse or rinses of a plating cycle or printed circuit line to prevent water spotting, stains or discoloration on nickel plate, chrome plate, copper and high copper alloys.

Quik Dri 1000 is especially useful in preventing stains resulting from chromium or cyanide plating solutions.

Solutions of Quik Dri 1000 may also be used to retard oxidation of the copper laminate in a printed circuit operation. The retarding of oxidation of the copper laminate is an advantage when boards are being stored for a brief period.

Features & Benefits

Water soluble liquid	Easy tank side additions
Reduces water on part surface	Reduces spotting on parts

Operating Conditions

Concentration	0.5 – 1 pint/100 Gal of water
Temperature	Ambient – 190°F
Equipment	Polypropylene, Polyethylene, PVC, stainless steel or coated steel tanks
Heaters	Stainless steel or quartz
Control	Prepare a fresh solution every day

Waste Disposal

Rinses containing Quik Dri 1000 may be discarded directly to a sewer or settling lagoon. In order to be completely informed on the latest disposal regulations for your area, please contact local authorities.
